

# Bloom

A multi-use upholstered meeting chair.

orangebox

➔ *BLOOM-WF & S*

## Product Description

Bloom is a new addition to the Smartworking landscape of products; younger sibling to the well-established Avi. While Avi offers a lounge sitting position, Bloom provides a more upright posture, for short-term focused work.

An additional layer of comfort is offered when Bloom is specified with a dynamic tilting mechanism – available on the central column and four-star base only – allowing a gentle rocking movement.

Bloom is manufactured in moulded foam for a refined level of comfort and durability, and is available with either a central column with four-star base or a wire frame base, both of which are available in our standard metal finishes.

## Product Specification
