

## PERSONALISED PRIVACY.

In today's interconnected workplace, workers throughout their day quickly shift from collaborative work to focused work and back again. The Divisio™ side screen allows workers to personalise their space based on the type of work that needs to be done. Users can easily remove the screen to allow for collaboration, or add the screen on any worksurface to create territorial boundary and privacy.

50% of workers lose up to 15 minutes a day to distractions in or near their work area.

C7794

### BOUNDARY

The Divisio side screen provides privacy for users, with a height that does not prevent impromptu collaboration. The user movable side screen features a 200mm overhang off of the worksurface for additional peripheral privacy.

C7802

### PERSONALISATION

Divisio allows users to personalise their work space to meet their needs. The fabric-wrapped, magnetic surface can be used for visual display, while supporting a wide range of aesthetics.

C8428

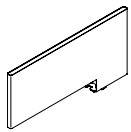

### FLEXIBILITY

The finger-trigger clamp fits on any worksurface from 19mm to 38mm thick, allowing for flexibility across multiple furniture solutions.

Watch a video about how to move the Divisio side screen.
