# Hay

A precise & comfortable
upright armchair.

→ *HAY-03*

## Product Description

Hay's strength and clarity of design means it works well individually, in larger groups and when grouped with other Smartworking products.

It provides a surprising wealth of design options, and is suitable for use in lounges, meeting areas and workspaces.

Hay can be specified with three bases: an inclined or flat cast aluminium four-star base, and a steel wire frame base (all available in our standard metal finishes).

It can be specified as a single colour block; with the seat and back as contrasting colours; or two-tone, with the outside back contrasting with the inside back and seat.
