grato

Comfortable and combinable:

flexible waiting area furniture range with a variety of options

Design: Wolfgang C. R. Mezger

grato:

combinable and flexible – fits into any design space.

grato opens new perspectives: The waiting area furniture ranges consists of different individual elements which can be combined in any configuration together with corner elements to fit the desired design space. This is due to the fact that the modules can be used in any setting and can fit into the design space concerned, offering many different variants with a large number of comfortable seating places. Meanwhile, the individual elements also function outstandingly on their own, such as in a traditional reception space.

Design: Wolfgang C. R. Mezger

- Modular room-dividing waiting space
- Variety of design options
- High degree of flexibility thanks to individual elements which can be combined freely
- Swivel armchairs
- Outstanding seating comfort thanks to a spring core insert
- High-quality fittings (chromed frame, decorative stitching, optionally in leather)
- Two frame options: Support frame with concealed back joint or sled-base frame for configurations
- Available accessory: matching side and laptop tables

Areas of application

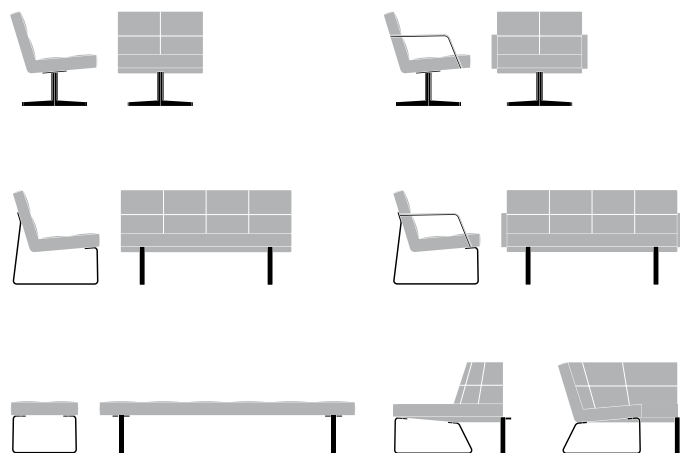

lounge

Can be combined to fit the design space: grato offers first-class seating comfort in waiting areas, with as many seating places as desired.

universal

For different situations: grato can be configured in all manner of ways and also functions outstandingly when on its own.

Overview of models

Classic design and first-class comfort.

The upholstery stitching and the minimalist design underline the classic look and feel of grato. The delicate frame gives the body a floating appearance: the modules have a pleasantly lightweight appearance, even when several elements are used in combination. This impression is further underlined by a seat surface inclined towards the back. This also ensures additional comfort, as does a spring core insert.

Also comfortable on their own, seen here, for example, as a swivel armchair with an optional return mechanism.

grato appears very inviting while at the same time creating an impression, even in the classic reception space, where the individual elements are also an outstanding fit. There are two frame options for two and three-seaters: the support frame of the standalone extends up to the back, where it has a joint with concealed screws. The sled-base frames used for configurations also serve as a linking mechanism between two individual elements.

One of many combinations – here in a leather version: arm-chair, three-seater bench with arm-rests and side table.

The highly polished chrome support frame on the standalone has a back joint with concealed screws – grato therefore cuts a fine figure even from behind.

High-quality fittings and many variants.

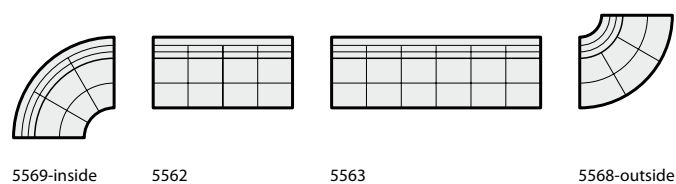

grato can be used in a whole range of situations: On the one hand, the combinations of individual elements can be reconfigured again and again, making them a safe investment for new spaces and changed situations. On the other hand, each element itself has a variety of available options in terms of fittings. Thus, the seat upholstery is available in a choice of fabric or leather, also with arm-rests if desired, which can in turn also have arm caps matching the material and colour used in the upholstery.

Four elements and countless possibilities.

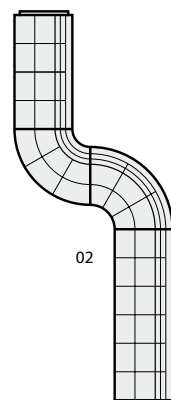

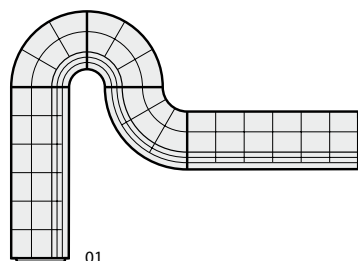

Straight segments and rounded corners – just four different elements permit long, freely configurable combinations which divide spaces up perfectly. Combining furniture with corner elements gives an infinite number of layout options. The individual elements available for combination: inside corner element, outside corner element, two-seater and three-seater. End elements can also be fitted with an arm-rest.

Combinable individual elements

Practical accessories for efficient waiting.

Additional elements for the range: side tables and laptop tables with various design options. The laptop table is a particularly impressive feature if waiting time needs to be used efficiently, making working on the couch comfortable. Its highly polished chrome-plated sled-base frame has four casters to make it mobile. The laptop table is optionally available with an oak-veneer or HPL table top, with all colours from the house collection available for the latter variant.

* Cannot be used as an end element in a configuration

Notes

See the current pricelist for details, prices and terms of business.
Technical changes, errors and colour variations excepted. Some of the models depicted are special, premium-cost designs.
Wood is a natural product. For our furniture ranges, we use only high-quality beech from sustainable forestry sources. Despite the woods being carefully selected, there may be variations in colour. Variations in colour and pattern are not grounds for product returns but rather an expression of the unique character of wooden furniture.
