we

Informal communication. Chairs, tables, barstools  
and benches for constructive conversations.

Design: Justus Kolberg

**we\_talk + we\_meet:**

**The most important decisions are not made sitting at a desk.**

Our new family, we, belongs in all of those places in a company where the office ends and the gradual move towards the cafeteria begins. we\_meet, the four legged chair, we\_talk, the barstool which is also available as a three seater and the matching tables create spaces for meetings, conversations and ad hoc meetings. In other words, for the casual communication.

Design: Justus Kolberg

The upholstered  
back support  
of we\_talk  
protrudes  
beyond the shell  
and creates  
a high level of  
comfort.

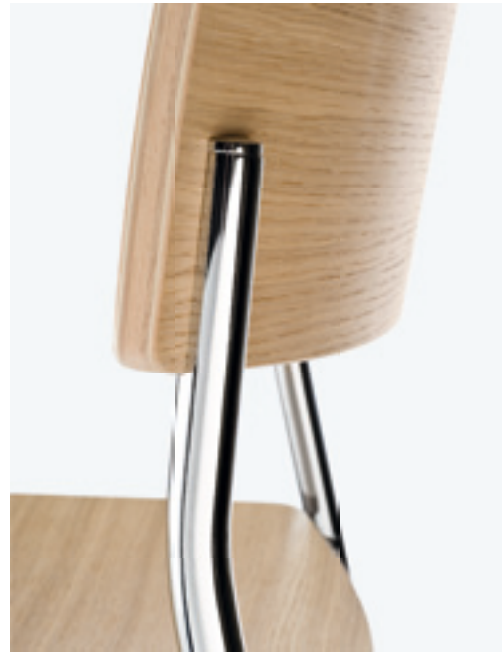

With we\_talk, the two to three-seater bench, no one will feel caught between two chairs since a third person can also take a seat for a short conversation. The conversation area is rounded off by the tall table. This is known as the active promotion of communication.

The tables in this series carry through the minimalist design of the we\_talk series, for example with their bevelled edge.

The elegance lies in the detail: the back support is attached by hidden screws and tapers off to a very thin edge.

Restrained, timeless design with no visible screws and a high level of comfort thanks, for example, to the knee roll design help ensure that the focus is on those using we\_talk and we\_meet rather than on the furniture. Constructive and profitable conversations are thus given a spontaneous feel.

## Notes

See the current pricelist for details, prices and terms of business. We reserve the right for technical changes, errors and colour variations. Some of the models depicted are special versions that are subject to additional costs.

Wood is a natural product. For our line of furniture, we exclusively use high-quality beech wood from sustainable forestry sources. Despite careful selection of the woods, there may be variations in colour. Differences in colour and structure are not grounds for product return but are rather a manifestation of the individual character of wood furniture. The natural beech wood tops on the tables in the buena series use so-called sliced veneers which always have a slightly different coloration from the solid wood used for the table legs. We therefore recommend stained table tops, edges and legs.
