Product Description

Lano is our programme of larger tables, designed to meet the increasing need for practical tabling – from the smallest meeting table to major conference configurations.

Lano's design is refined and elegant thanks to its uniquely architectural cast aluminium legs, which are designed to accommodate generous seating provision while maximising free leg space, no matter where you sit. The range encompasses a wide range of sizes and shapes, from the smallest 1200mm table to the super-large 2000mm X 6200mm conference table for up to 24 delegates. The modular leg frame architecture has been designed and engineered to accommodate tables of infinite length, and afford diverse choice.

Circular, oval, soft square, soft rectangle, square, rectangular, barrel and soft vase... Lano's multiple top shapes, can be specified in multiple sizes, veneers, finishes and top edge profiles. Standard sizes go up to 1200mm wide and 6200mm long, but Lano can also be specified in widths of up to 2000mm with infinite lengths. (See option and specification pages for details.)

Lano's precision-engineered die-cast aluminium sculptural legs connect into an expressed and contrasting structural cross frame, via a unique and refined pivoting connector. This elegant sub-frame is designed to intelligently house components for all intended applications, enabling individual elements to be functionally robust while the product itself remains visually light.
