linos

Comfortable and sophisticated.

The chair for all occasions.

Design: LSS designer

linos sled-base chair:

The comfortable all-purpose chair for large and small rooms.

linos is a family of chairs that knows how to convince thanks to its clear formal language and sophisticated functionality – whether it's in the theater, in the seminar room or in a cafeteria. Many models are also available in a hygienic plastic version. The ergonomic construction of seat and back provides unlimited seating comfort. Thanks to the knee roll, blood circulation is not impeded. And no cross-braces are in the way at the front legs, providing more freedom of movement. This makes linos the ideal chair for events that take a bit longer. Moreover, this series is easy to handle. The perfect complement: the variety of versions and the comprehensive accessory program. With its selection of colors, linos fits any design concept, and it can even be equipped with Electronic Seat Numbering (ESN) upon request.

Design: LSS designer

- Sled-base chair made of chromed wire steel
- Also available with seat and back made of hygienic plastic
- Ergonomic armrests in easy to clean plastic finish
- Unlimited seating comfort
- Perfectly suited for indoor and outdoor use
- Attractive price

Areas of application

universal

linos offers unlimited seating comfort in any situation and is easy to handle.

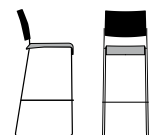

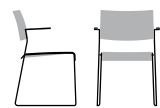

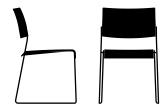

event

Even during longer events, the ergonomic shape provides seating without tiring.

cafeteria

linos will support any design concept. With its plastic seat and back it is also perfectly suited for outdoor use.

Model overview

Lots of comfort – even during extended sessions.

Being able to listen with concentration, to reflect, to engage in a lively discussion – all this is only possible for an extended period of time if you're sitting well and comfortably. linos is particularly well-suited for this, since it is shaped ergonomically so that it can provide high and tireless seating comfort even for longer time periods. That way, seminars stay exciting all the way to the end, and even long meetings can be easily dealt with.

For deployment on wall-to-wall carpeting, the sled-base chair is also available without glides.
Modell: 1224/A

1224 | 5272

Lots of possibilities, lots of atmosphere.

In its combination of light-colored wood and chrome, linos comes across as lightweight, creating a friendly and modern atmosphere. This has a particularly positive effect in a low-key and purist architecture. But linos can do much more: the all-purpose chair with its many versions is also available in several stained colours and a great number of colored lacquers. So it can be integrated into the most diverse spatial concepts. In the version with plastic seat surface and back, linos is particularly hygienic, easy to handle, and can even be deployed outdoors. This makes it the ideal chair for cafeterias and bistros.

With its clear
and delicate
formal language,
linos perfectly
fits modern
architecture.
It is also available
as a barstool.

1201

**linos 4-legged chair:
a well-rounded affair.**

linos is also available as a 4-legged chair made of chromed circular tubes, and moreover in a hygienic plastic version – a chair of many possibilities. Seat and back can be either upholstered, made from laminated wood or plastic. linos can come as a chair without armrests or with plastic arm rest brackets. So it will fulfill, depending on the area of use, all wishes and requirements. Whether it's in the seminar room or in the cafeteria, in an auditorium or grouped around a table – linos will always provide high seating comfort and convince thanks to its varied design.

- 4-legged chair, also available with seat and back made of hygienic plastic
- Ergonomic armrests in easy-to-clean plastic version
- Unlimited seating comfort
- Also available as a comfortable high-back chair
- Perfectly suited for indoor and outdoor use
- Attractive price

Areas of application

universal

linos provides unlimited seating comfort in any situation. Its clear and matter-of-fact formal language will integrate into any spatial concept.

event

Even during longer events, the ergonomic shape ensures seating without fatigue. linos is stackable and easy to handle.

Model overview

Among linos' compelling characteristics are its individuality and versatility. Black, white or colourful, with soft upholstery, in beech or plastic finish – the many colour and material variations leave nothing to be desired. Moreover, the four-legged model is also available as a comfortable high-back chair with continuous seat shell, optionally featuring ergonomically optimized plastic armrests – providing even more seating comfort. The plastic armrests are hygienic and also very stable. They facilitate getting up and sitting down, which makes them perfectly appropriate for deployment in hospitals and care facilities.

Modern and clear design, versatile options for variation.

linos makes seating enjoyable.

We spend many hours of the day in a sedentary position. Thanks to ergonomically designed chairs, our activity level can still remain undiminished. That's why linos is available with a three-dimensionally shaped seating shell featuring a seat mould that perfectly adapts to the body. The ergonomically shaped knee roll ensures good blood circulation. Doing away with cross-braces between the front legs of the chair creates lots of freedom of movement for the legs of the person sitting on it. So seating becomes enjoyable – even for hours on end.

linos gives support wherever it is necessary, without limiting freedom of movement.

1224/A

linos made of hygienic plastic:

Comfort and functionality both indoors and outdoors.

linos is available with a plastic seat and back both in its sled-base version and as a four-legged chair. This makes it particularly appropriate for outdoor deployment, e.g. in a cafeteria or student restaurant. It is hygienic, robust and easy to clean, and so it also fulfills the high requirements of hospitals, homes for the elderly and care facilities. Wherever hygiene, functionality and comfort are important, linos provides the solution. At the same time, it can be integrated into any design concept thanks to its numerous colour variants, and linos knows how to convince with its good value for money.

- 4-legged and sled-base chair featuring a seat and back made of hygienic plastic
- Ergonomically shaped armrests made of easy-to-clean plastic
- Unlimited seating comfort
- Perfectly appropriate for indoor and outdoor use
- Attractive price

Areas of application

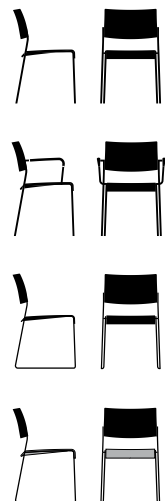

universal

linos offers unlimited seating comfort in any situation as well as easy handling.

care

The plastic version fulfills the high requirements in terms of hygiene for hospitals and nursing homes.

Model overview

linos

Whether as a sled-base or 4-legged chair, whether with or without armrests – linos is always convincing in terms of its high seating comfort. While at the same time coming across as graceful and light. Straight lines characterize a modern, clear design. The concept of this chair family moreover fulfills all requirements in terms of ergonomics and handling. linos is easy to clean, robust and can be stacked easily. The new optional armrest brackets made of hygienic plastic offer an additional plus in terms of comfort and security, because they are a true support when sitting down or getting up. This also makes them perfect for the ill or the elderly.

Beautifully versatile – the plastic version of linos is also available in the colours stone, lava, petrol and viola.

1208/A

1208

Sophisticated solutions for more efficiency.

One of the most important functions of a chair for large venues: easy, time-saving handling. linos in its sled-base version fulfills this requirement thanks to its strikingly simple row linking device integrated into the glides. It enables chairs without armrests to be linked quickly and easily. Even rows where chairs with armrests and chairs without armrests are placed alternatingly can be linked in this manner. And chairs with armrests featuring an extensible row linking underneath the seat can also be linked to each other. Thanks to the optionally available Electronic Seat Numbering (ESN), each individual chair can be numbered quickly and clearly.

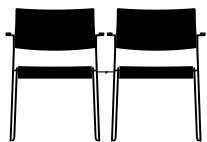

Chairs with armrests are comfortable. Thanks to the extensible row linking, they can be linked into rows quickly and easily.

Row linking integrated into the glide
without armrests/without armrests
with armrests/without armrests

chair | chair = 51,5 cm chair with armrests | chair = 51,5 cm

Row linking via extensible row linking
with armrests/with armrests

chair with armrests | chair with armrests = 58,0 cm

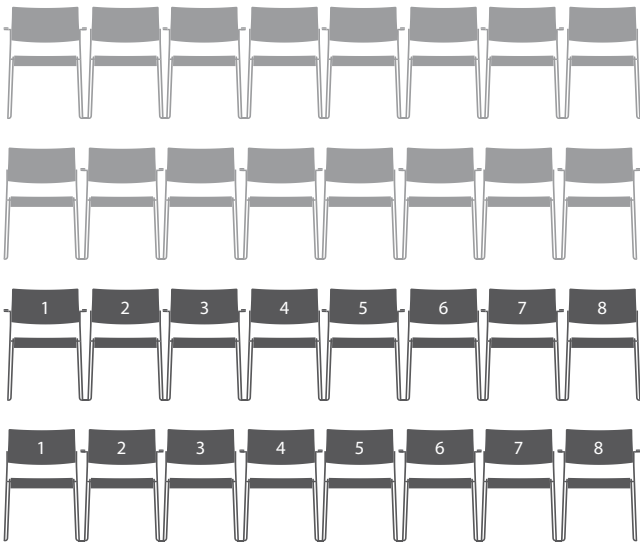

Attached quickly – the row linking device integrated into the glides of the sled-base chair is simply a stroke of genius.

Electronic Seat Numbering – fast and easy.

Time and time again, chairs need to be renumbered for great venue events. Thanks to the Electronic Seat Numbering, this works in an absolutely uncomplicated way – taking only 10% of the time usually necessary. Working the system requires no prior knowledge. With a single push of a button, entire rows of chairs can be numbered by remote control – automatically in ascending or descending order. Any chair may serve as the first chair in a row. The signals are transmitted via infrared through the entire row of chairs to the individual displays. So there's no need for any obtrusive cables. The displays are integrated into the seat surface and display the chair number in an easily readable size. At the same time, these displays do not need any power. Optionally, they are also available in a lighted version.

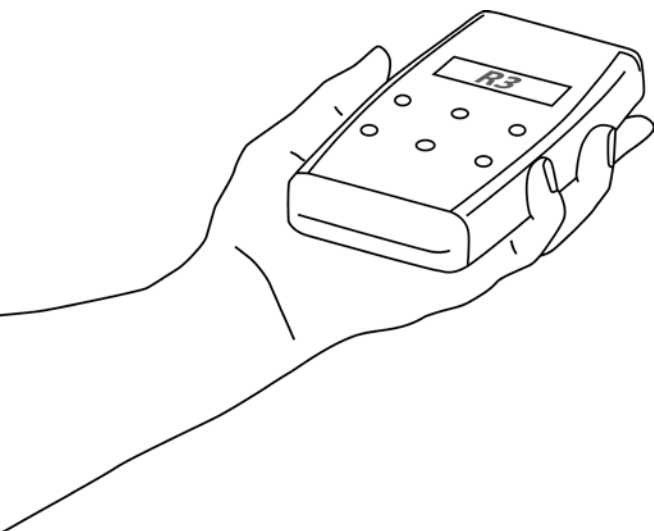

Conventional method*:

1 chair: 20 chair**
1.200 chairs = 6,5 hours

with Brunner ESN:

1 push of a button: 1 second
1.200 chairs = 0,5 hours***

- * seat numbering as magnetic numbers and clip-on row numbers
- ** for attaching and detaching the magnetic numbers
- *** including attaching and detaching the electronic row numbering

Thanks to infrared technology, the signals can be transmitted without any cables. Optional: the row numbering display. It is clicked on and later detached using a special tool.

Functional and flexible thanks to storage and transport trolleys.

Not all linos chairs may be deployed at the same time, or some may be used in a different room. For this, there are special storage and transport trolleys available. They can take up to 70 chairs stacked low. This saves time and makes placing and replacing the chairs easier. In order to go easy on the upholstery, the chairs can be optionally equipped with a stacking protection. This ensures that they stay nice and intact for a long time. And if any part needs replacing, seat and back parts as well as the armrests can be easily unbolted and exchanged.

Notes

See the current pricelist for details, prices and terms of business. We reserve the right for technical changes, errors and color variations. Some of the models depicted are special versions that are subject to additional costs.

Wood is a natural product. For our line of furniture, we exclusively use high-quality beech wood from sustainable forestry sources. Despite careful selection of the wood, there may be variations in color. Differences in color and structure do not constitute a reason for complaint but are rather a manifestation of the individual character of wood furniture.
