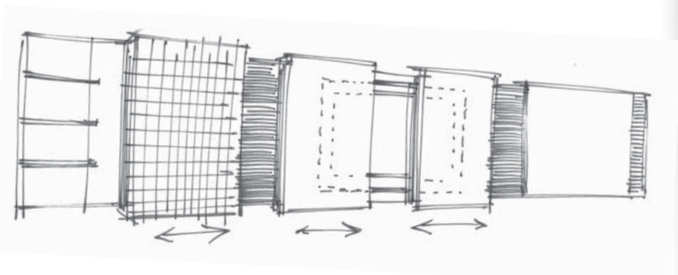
Observations & Insights

1 - Users want to show, compare and share paper and digital information with ease.

2 - They want to feel comfortable when presenting, installing laptops easily, having access to power and information, food, drink and other stationery.



H. System & Mobile Elements

The best tools to support collaboration

Collaboration is about sharing information and generating new ideas with others – digitally or on paper. Whether you are involved in a formal presentation, a debate or a comparison of data, **the exchange of information needs to be effective and productive**. This requires the right tools.

Little or no importance is placed on the preparation and organisation of collaborative meetings. For example, presentation equipment is insufficiently prepared, causing meetings to start late; or inadequate arrangements are made for speakers and presenters, preventing them from adopting comfortable positions or communicating their information easily.

H. System and Mobile Elements have been conceived to make collaboration a success.

Why H. System?

1 - Two-layer system, integrating digital and paper media.
2 - Large vertical surface to write on and compare information.
3 - Integrated storage elements to store presentation tools.

Why Mobile Elements?

1 - User-friendly solutions for the diverse requirements of collaboration environments.
2 - High user-comfort (height adjustable, movable).
3 - Intuitive access to power at user level through integrated cable management.

C4588

H. System

The H. System offers large functional space with a wall mounted rail system, to which fixed and movable boards can be attached. **The two-layer system increases the use of vertical surfaces by offering presentation solutions for digital and print media**. Finishes can be co-ordinated with other furniture elements to create a coherent collaboration environment.

Write
Your notes on the white board or the glass panels can be easily re-arranged to compare information.

Display
Pin up print information.

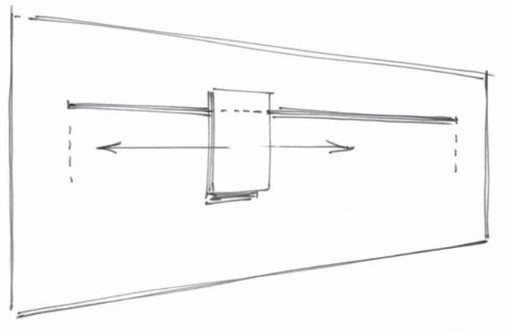
Store
Pencils and other stationery at hand in the integrated storage elements. Panel to hook in 1+1 elements.

Harmonise
Surfaces can be co-ordinated with other furniture.

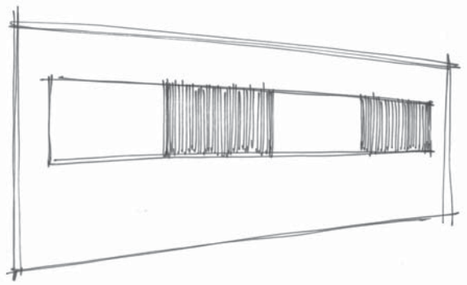
Present
The integrated monitor enables digital media presentation. Cables run behind the panels.

H. System

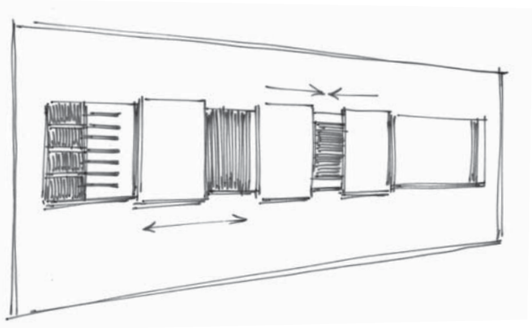
The wall mounted rail system is available with different levels of functionality. **The two-layer system allows to upgrade the equipment** from a simple static white and pin board arrangement up to an integrated multimedia system. The modular construction enables simple adjustment and extension as the widths of the panels and units are co-ordinated.



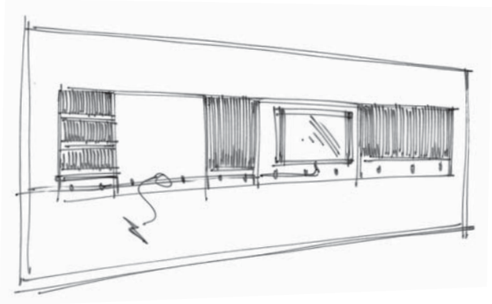
Movable boards on rail
Feel free to position your notes.



Static Boards
Large fixed presentation space.



Combination of static and movable boards
The most effective way to re-arrange
and compare information.



Integration of monitor
Cable management is totally integrated
in the system to maintain a clean appearence.

Mobile Elements

These are intelligently designed supports for the presentation, projection and display of digital and printed information within a collaborative environment.
Re-arrange and adjust according to your needs.

Every element with integrated electrification offers access to power at the user level. Colours and surfaces match furniture elements to create a coherent environment.

Height adjustability
for user comfort.

Integrated electrification
Cable run inside the column to the sockets in the drawer of the Cable Box.

Cable Box

Catering
Two levels for food and drink.

Basic
Height adjustable.

Presenter
Height adjustable with access to power at user level.

Media-Mount
Integrated monitor on mobile support.

Lectern
Height adjustable with access to power at user level.

Coat Rail
Space for your wardrobe.

Flip-Chart
Adjustable paper hooks and tear-off edge.

Pin-Board
Instant space division and space for presentation.

Multifunctionality

The Pin wall makes collaboration easy. By making intensive use of vertical surfaces it helps to show and re-arrange paper or digital information. In addition, **you can create small team spaces instantly by sub-dividing large multipurpose meeting rooms**.

Space division
with the magnetic
linking of two Pin walls.

Projection of digital information
on the white
felt surface

Easy to roll

Legs with magnetic linking

* Only Mobile Elements

Mobile Elements environmental performance (example: Presenter)

You need clear evidence to support your environmental credentials. We can provide it.

End of life

Up to **98%** recyclable by weight.

100% recyclable cardboard and LDPE film for packaging.

Plastic parts clearly labelled for easy sorting and effective recycling.

Material

42% recycled content by weight.

90% recycled cardboard and **30%** recycled LDPE film (Low Density Polyethylene) in packaging.

Use

Designed for a long product life.

Replaceable parts.

Maintenance information available on Steelcase.com.

Production

No gluing processes.

Powder-coat painting: VOC-free and free of heavy metals.

Transport

Manufactured close to customers, in Europe.

You require official certifications. We can deliver them.

Restriction of the use of hazardous substances in electrical and electronic equipment (RoHS).
RoHS compliant technology components.

Product Environmental Profile (PEP). Based on ISO 14021, its purpose is to communicate precise and verifiable information on environmental aspects of the product during its life cycle.

You care about the end of use of your furniture.
We offer options - be it refurbishing, take-back, charitable donation or recycling.
