Insights & observations

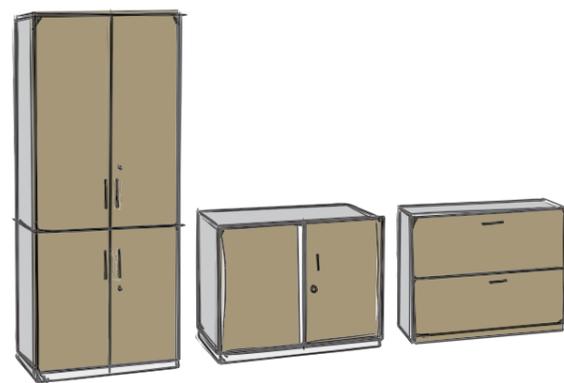

1 / Storage is underutilised and there is a growing diversity of items to store.

2 / People lose 30 minutes per day searching for information and objects.

3 / With the rise of collaborative working, users need more place to meet and display information.

4 / Office space is shrinking. Storage becomes a divider and structural element.

Endless storage space

Share It is a solution that pushes back the boundaries of storage by increasing both space efficiency and user effectiveness.

Why Share It?

1 - Its modularity and diversity allow space to be structured. It adapts to different space planning (open or closed) and user needs (individual or team).

2 - It enhances the sharing of knowledge and help users to be efficiently organised.

3 - Its sleek design and broad finishes palette are a motivational factor for users.

03985

03985

A complete system

Share It boasts a broad range of elements which consistently meet the storage needs of any office. This diverse portfolio includes items tailored specifically for personal storage as well as shared resources for team areas.

C3456

Structure for team spaces

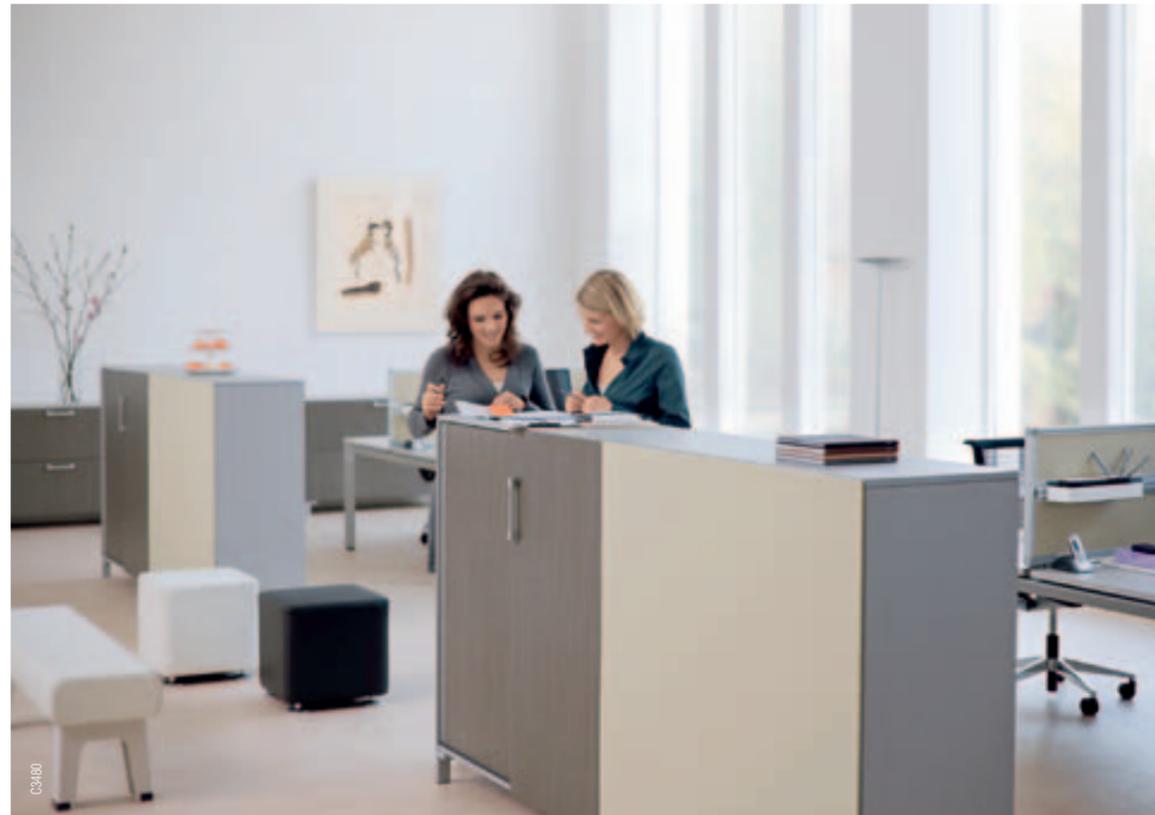

Thanks to its modularity, Share It makes it easy to structure team spaces and to save valuable square metres. Cupboards for storage can also be easily turned and utilised as space dividers and communication zones. At the same time, Share It provides the freedom to concentrate and work decisively.

With its sound absorbing front and back and Partito Screens, Share It helps users to balance privacy and contact with others – even in a large team space.

Supports collaboration and communication

Share It incorporates unique features that encourage collaboration and communication in the office. Glass fronts can be written on to create dynamic and interactive areas for meetings. Integrated storage at Meeting points facilitates easy access to relevant information and knowledge.

Impromptu meetings Informal discussions in the office are often a source of new ideas and creativity. Use the surfaces of storage cabinets for an impromptu meeting. Share It offers many different heights to support instant collaboration.

C4353

Signaling communication zones Overhead 'umbrellas' can be used to designate communication areas and provide greater privacy.

C3502

Helping people concentrate

Noise disturbance is one of the greatest threats to concentration performance. Our research shows that it can take up to 15 minutes to regain concentration after being distracted at work.

The combination of Share It and Partito screens minimises sound pollution and creates privacy for comfortable, decisive working. Different materials can be chosen to personalise the workspace, including Melamine with a unique pattern, front or back, side-opening tambour door and different coloured fabrics as back panels.

Secured space

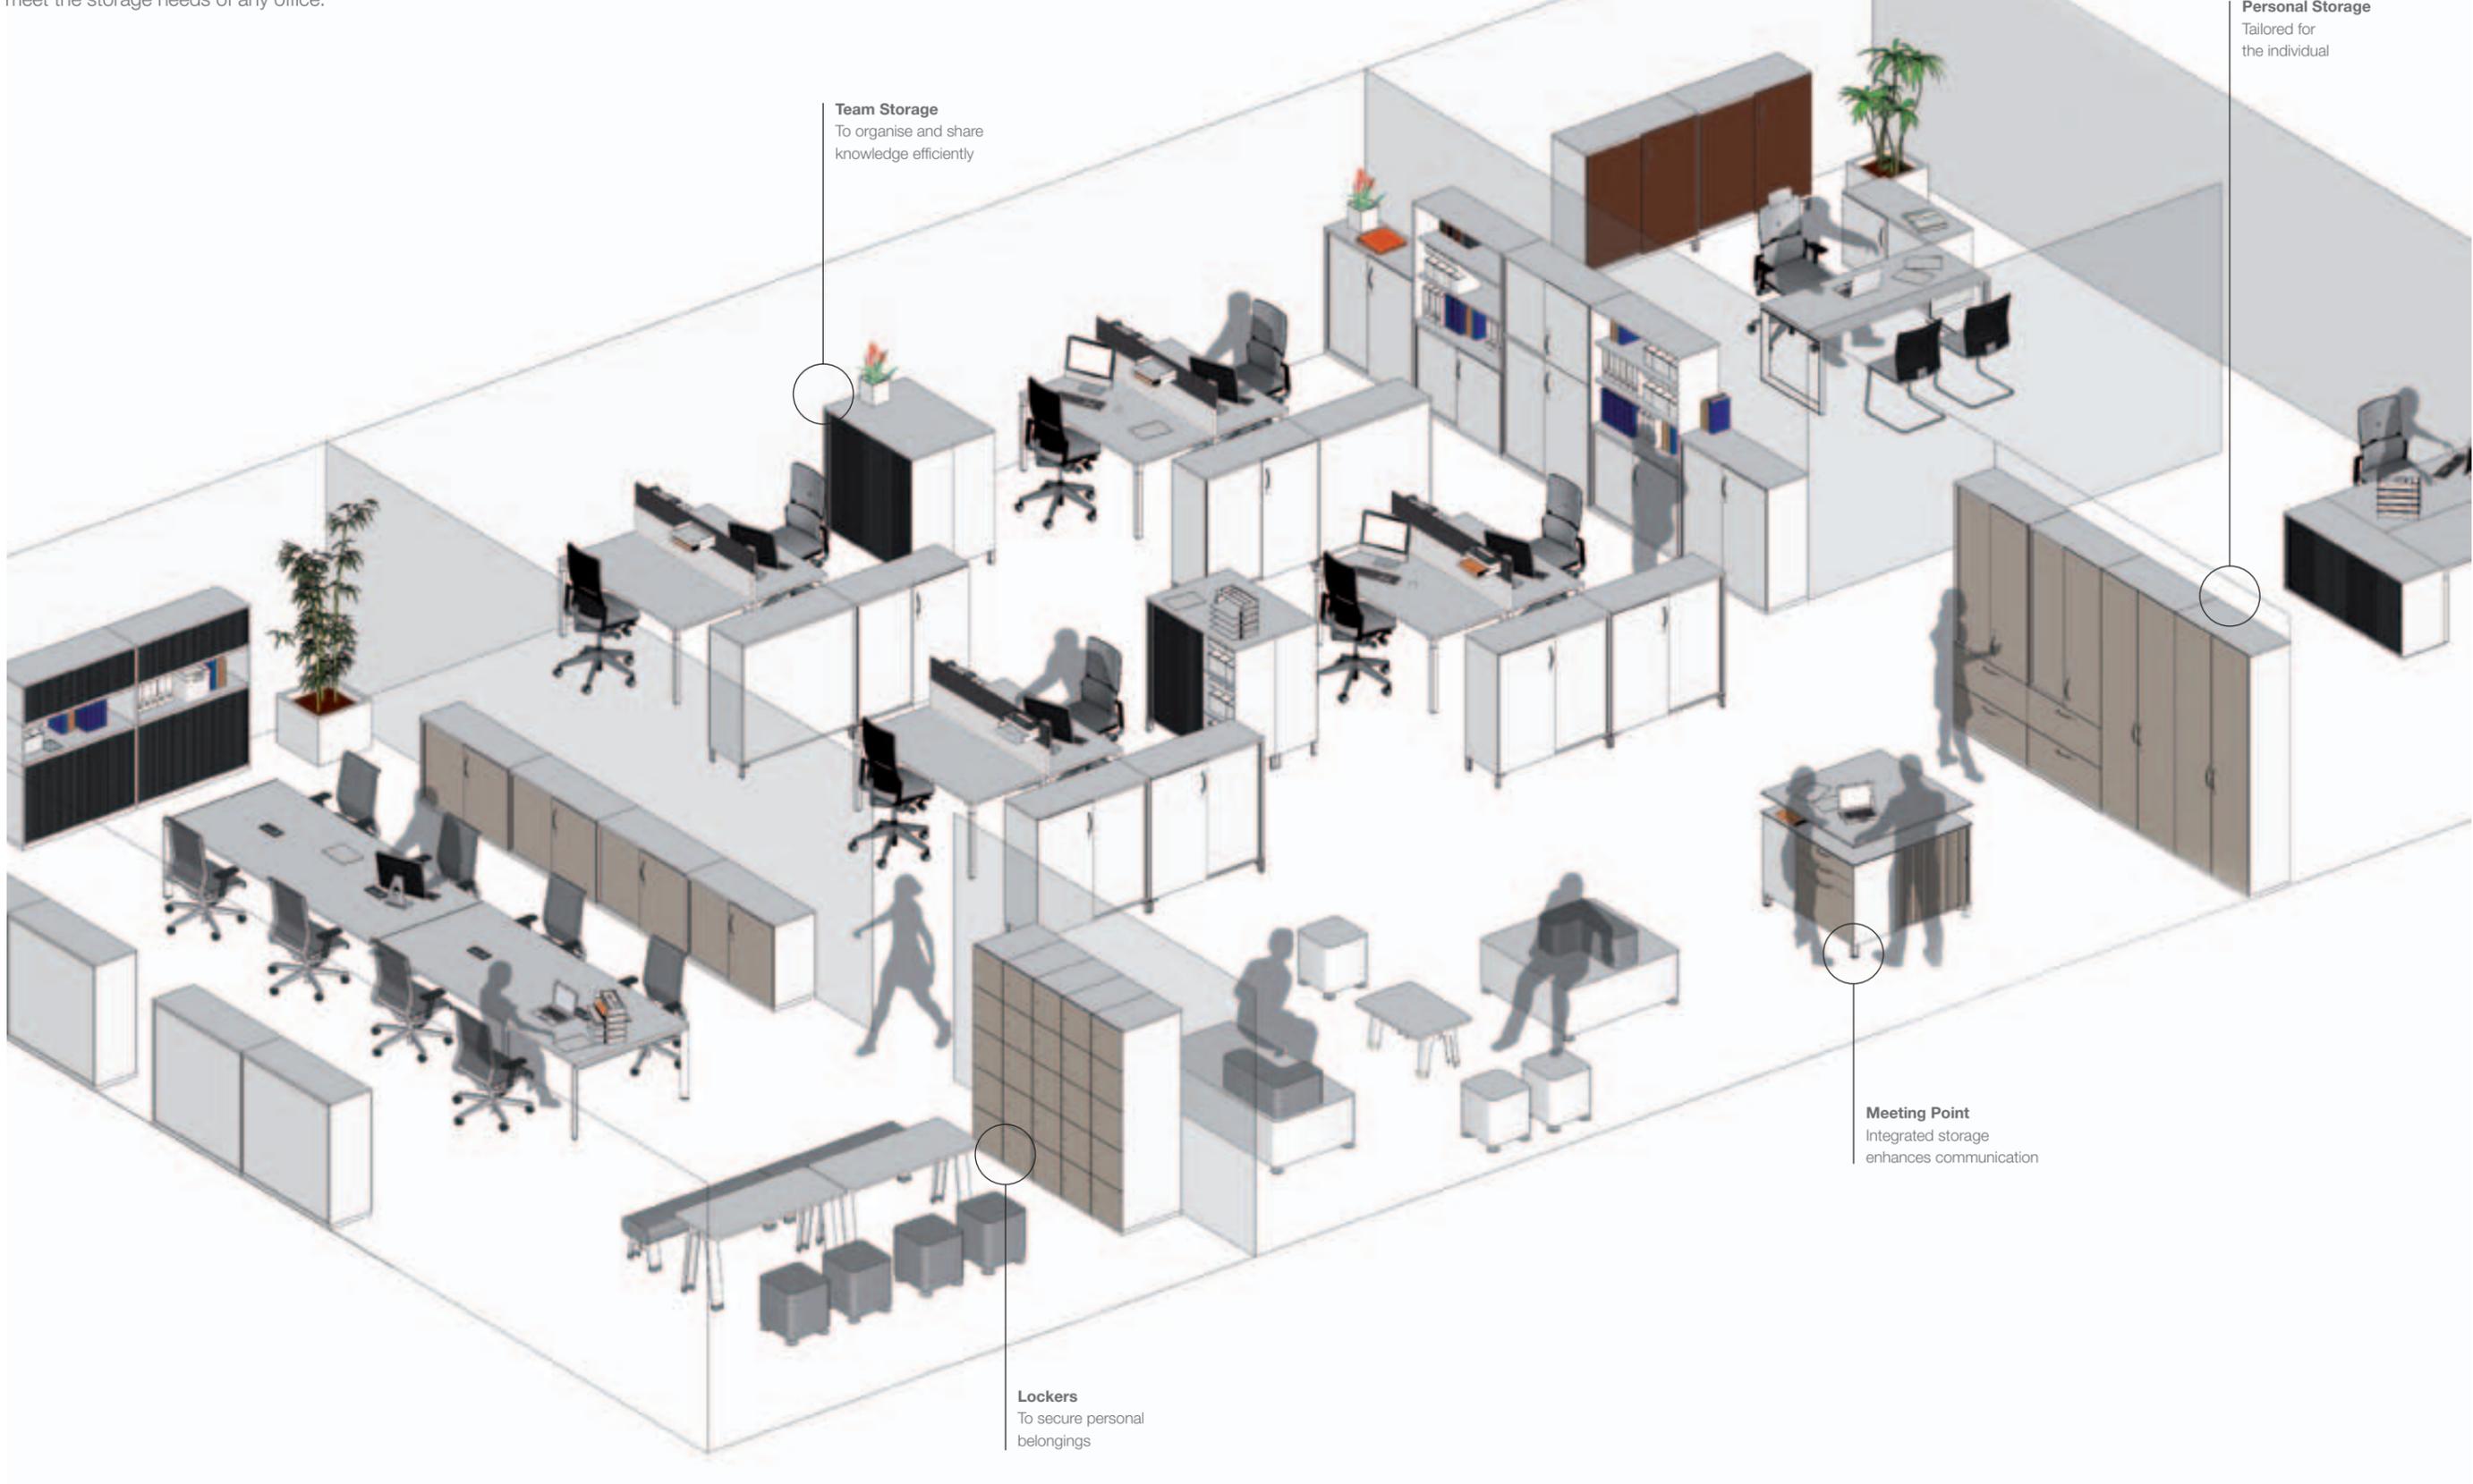

New technologies are making people more mobile in the office and in their working lives in general. Individual spaces at work are shrinking and yet research shows that personal space is incredibly important to people. Share It offers secure lockers for dedicated personal storage and peace of mind.

Personal lockers

Storage for a large number of activities

Share It boasts a broad range of elements which consistently meet the storage needs of any office.

To secure personal belongings

Minimal effort for maximum organisation

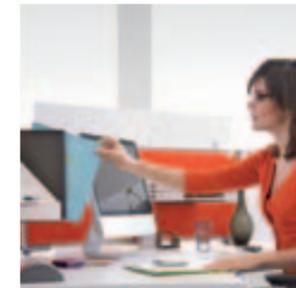

For most people storing can seem an effort and a thankless task but with our proprietary research based AAA (Active - Anticipated - Archived) approach to organisation and our extensive range of 1+1, Steelcase has taken the burden out of storage. Our research shows that you can improve performance and efficiency by providing flexible systems which support three broad types of storage: Active, Anticipated and Archived.

Anticipated

Active

Archived

Active storage
Active material is used daily. It must be kept visible, on or above the desk.

C1043

Anticipated storage
Material needed at least once a week, for referencing or work waiting to be done, should be kept at hand's reach, above, under or close to the desk.

C3465

Archived
Information & objects infrequently accessed find their place in archived storage solutions nearby, or further away.

C3593

49% of Europeans do not have enough space to store their stuff.
For 36% of them storage is not adapted to the object/support/formats they need to store.
35% do not have enough accessories to store neatly.*

* IPSOS Workplace Survey 2007

Efficiency with 1+1

Share It can be coupled with Steelcase's extensive range of 1+1 to maximise efficient use of space within the cupboard. Conventional cupboards do not support the array of items stored today and often lead to increasing capacity at additional costs.

Environmental performance

Since 1912, Steelcase has been committed to continually reducing the environmental impact of its products and activities on a global scale, by constantly seeking more effective ways to conserve resources, prevent pollution and nurture environmental consciousness in its people every day.

Life cycle assessment

Thanks to the Life Cycle Assessment (LCA) method, Steelcase quantified Share It's environmental impacts to set the stage for further improvements. This method, based on ISO 14040 and 14044 and selected by The European Union for environmental evaluation, allows us to quantify the environmental impact of our products throughout their whole lifecycle.

To show continuous improvements, we communicate our products' environmental performance through voluntary environmental labels and declarations. Sustainability related actions and results are communicated in the annual Steelcase Corporate Responsibility report.

Designing for the environment requires innovative thinking and solutions

During our product development process we evaluated its environmental aspects at each stage of its life cycle: from materials extraction, production, transport, use and reuse, until the end of its life.

End of life

- 97% recyclable by weight.
- 100% recyclable cardboard and plastics used for packaging.
- Modular and easy to disassemble using normal hand tools.
- Contains only few different materials making sorting for recycling easy.
- Plastic parts labelled for recycling.

Use

- Designed for an extensive life time.
- Possibility to modify the interior to answer users changing needs over time.

Transport

- Optimised packaging weight and materials types.
- It is manufactured close to customers.

Materials

- 17% recycled materials, by weight (2% pre-consumer + 15% post-consumer).
- No hazardous materials (no Chrome VI, no Mercury and no Lead), no dangerous materials (PVC) and no hazardous flame retardants.
- 7% of weight reduction compared to similar storage, without altering robustness.
- Packaging: 30% to 100% recycled material.
- Water based inks without solvent for paper and packaging.

Production

- ISO 14001 and EMAS II certified plant in Durlangen (Germany).
- Powder-coat painting: VOC-free and free of heavy metals.
- Unused paint that does not attach to the product can be directly reused in the process.

You require official certifications. We can deliver them.

EPD **Environmental Product Declaration (EPD).** Based on ISO/TR 14025, its purpose is to communicate precise and verifiable information about a product's impact on the environment at all stages of its life cycle.

Indoor Advantage. This product, when made in Europe and in North America, is Indoor Advantage™ certified, meaning that it meets tough indoor air quality standards.

PEFC. The wooden components are PEFC certified (Programme for the Endorsement of Forest Certification), ensuring that wood originates from sustainably managed forests.

E1 **E1.** The particle boards comply with the "E1 standard" guaranteeing a low level of formaldehyde emissions.
