Perimeter

An extensive
upholstery system.

orangebox

➔ *PR-03 DB & 04 DB*

Product Description

Perimeter's modular elements offer multiple product combinations, configurations and upholstery options. Perimeter ranges from standalone bench and booth units through multiple length contemporary sofas (both low and high back) to linked scenarios for either open collaborative working or – when partially enclosed – greater privacy.

Perimeter's broad product range and architectural presence means this classic Orangebox design works equally well within confined spaces, large open-plan areas and vast atriums. Perimeter is a companion product to Boundary, sharing the same contemporary design and cast aluminum leg, which allows the ranges to be combined in scenarios where both single and double seating are required.

The two curved Perimeter units can be specified as either low or high back. The clarity of their architectural form and the ease with which they can be combined provides welcome diversity in configuration and makes

them useful for space planning. As with the full Perimeter range, they work equally well with freestanding or linked tabling.

Perimeter's high back units, meanwhile, are valued for their ability to achieve privacy within open plan workspaces. The design allows designers and specifiers a wide choice in fabric selection, and the flexibility to either play with complementary blocks of colour or combine plain colours with more exuberant textures and patterns.

The banquette takes Perimeter into a precise function and space planning typology, with units linked back-to-back, and able to be combined with worktables, offering power and data connectivity. The sculptural cast aluminum leg can be replaced by a box base to suit different design schemes. As with the other upholstery systems, the Perimeter's fully updated full potential, scope and specification options are set out in our annual price list.

Product Specification
